SIGEA APS is: Italian Society of Environmental Geology
National Social Association

SIGEA is a multidisciplinary, non-profit National Cultural Association for the promotion of the role of Earth Sciences in the protection of human health and safety, in the safeguarding of the quality of the natural and man-made environment and in the more responsible use of the territory and its resources. SIGEA is recognized by the Italian Ministry of the Environment as a "national environmental protection association" pursuant to art. 13 of Law 349/1986.

SIGEA è un'associazione culturale nazionale multidisciplinare , senza fini di lucro, per la promozione del ruolo delle Scienze della Terra nella protezione della salute e nella sicurezza dell'uomo, nella salvaguardia della qualità dell'ambiente naturale ed antropizzato e nell'utilizzazione più responsabile del territorio e delle sue risorse. SIGEA è riconosciuta dal Ministero dell'Ambiente Italiano come "associazione di protezione ambientale a carattere nazionale" ai sensi dell'art. 13 della legge 349/1986.

The International Symposium has been organized by SIGEA (The Italian Society of Environmental Geology) and ProGEO (The European Association for the Conservation of the Geological Heritage). The Symposium has been structured in a plenary session and four thematic sessions:

1. Geosites, to discuss the recent developments in geodiversity assessment methodologies and geosites inventories in Europe and, also, to discuss the legal frameworks supporting geoconservation strategies;
2. Geological heritage and land-use planning, to discuss land-use planning, threats and constraints and to promote the best practices and lessons learned in regional and local land use planning;
3. Geoparks and Geotourism, to encourage a possible convergence between geoconservation and geotourism and to discuss sustainable management policies and geosites exploitation within geoparks;
4. Cooperation and Education; to improve international cooperation and local initiatives for the education and divulgation of science and to establish links between geoconservation specialists, mainly in Mediterranean area.

Proceedings of the national conference TECHNIQUE OF ANCIENT HYDRAULICS

The first SIGEA conference called "Ancient Hydraulic Technique" took place in Rome in September 2006. He highlighted how hydraulics, a branch of science and technology that studies and implements water control systems, making its consumption and use possible, has been and has always been one of the indicators of stage of civilization reached by the peoples. He also highlighted the levels of knowledge and construction skills of enormous difficulties faced if it is thought that the works were built 2000 or even 3000 years ago. This volume, published ten years later, contains the proceedings of the second Sigea conference on ancient idraulic techniques.

Il primo convegno SIGEA denominato "Tecnica di Idraulica Antica" ebbe luogo a Roma nel settembre 2006 . Mise in evidenza come l'idraulica, branca della scienza e della tecnica che studia e mette in atto sistemi per il controllo dell'acqua rendendone possibile il consumo e l'utilizzazione, sia stata e sia, da sempre, uno degli indicatori dello stadio di civiltà raggiunto dai popoli . Mise in evidenza anche i livelli di conoscenza e di capacità costruttive di enorme difficoltà affrontate se si pensa che le opere furono realizzate 2000 o anche 3000 anni or sono. In questo volume edito dieci anni dopo si riportano gli atti del secondo convegno Sigea in materia di tecniche di idraulica antica.
