Cliente Lares Italia

La Realtà Virtuale per l'apprendimento esperienziale

Sisma VR mira ad educare i partecipanti alla corretta prevenzione dai rischi dovuti al terremoto

Rendere impattante ed efficace la formazione in un contesto non sempre replicabile nella realtà. Le persone all'apprendimento dei corretti

Un'esperienza di Realtà Virtuale che replica in utilizzando uno strumento che immerge le persone maniera realistica gli effetti di un terremoto e guida

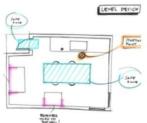

Lares: proiettata al futuro e fucina di competenze

Lares Italia è un'associazione che coinvolge studenti e laureati direttamente connessi o affini alla Protezione Civile. La sua mission è promuovere in questo ambito attività di informazione, formazione, aggiornamento e intervento in situazioni di emergenza.

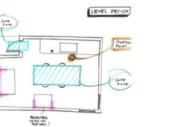

Lares Italia, per illustrare alla cittadinanza i rischi derivanti da scosse di terremoto, utilizza strumenti come depliant informativi e contributi video.

L'associazione si è avvicinata ad Ugido per identificare nuovi e più efficaci strumenti di formazione e sensibilizzazione sugli effetti di un terremoto, e sulle linee guida per ridurre al minimo il rischio per le persone.

Civil Protection Volunteers Training

Objectives

Management Systems (IDMS) among volunteers of the Civil Protection (CP) organisations.

of innovative educational tools for Civil Protection volunteers.

Increasing awareness

of the importance of natural disaster prevention and management of emergency situations in the civil protection.

Identifying good practices

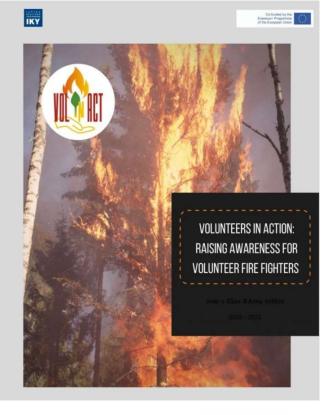

at European Level comparing different national approaches related to CP Management and CP volunteers involvement.

Spreading information

about the normative related to CP at EU level and providing a deep and specialized knowledge on CP voluntarism.

Dissemination of the needs for forest fire prevention;

Raising forest fire awareness activities and development of training activities for volunteers;

Creation of volunteers profile to cooperate with firefigthers-volunteers.

Adults will understand the importance of volunteerism and learn about natural and cultural conservation of the forests

Adults will be ready for a fire or other emergency event and be competent and confident in emergency response procedures and the use of first attack fire equipment

DELIVERABLES

- 1. Competence map development for volunteers interested in firefigthing and protection;
- 2. Creation of a training toolkit for volunteers
- 3. Training and testing methodology
- 4. Open Education Resource
- 5. Strategy game for android

The Covid pandemic has impacted the lives of the young people, who needed to reorganize several aspects of them to make them fit the new situation. In this context, youth workers too had to adapt their methodologies to the new social distancing rules, in order to keep supporting the youngsters. The importance of their role has been of the maximum importance in this situation of emergency, as the importance of emotion management of the youngsters has grown at the same time.

The goal of EduSafe is to collect a series of methodologies implemented during the emergency to support young people. The collection of these successful experiences, that space from training young people on risk management to the adaptation of different activities to deal also emotionally with the pandemic, will become a unique tool to support youth workers in their job.

FUTURE

Strategic partnerships in particular with Central/Northern Europe and non-EU countries

·Increased use of new technologies for risk prevention
(VR, apps, smartwatches, mobile phones ecc.)

•Artificial intelligence aimed at preventing and mitigating risks

•Training of trainers through the use of international exchange of good practices

•International collaborations — Horizon/Life/Interreg

Thank you!!!
